

PUMP SYSTEMS

Fluid Systems Fill-Interface Caps, Necks and Accessories

From Wisco Products

If you manufacture combustion engine driven pumping systems, whether skid mounted, trailer mounted or truck mounted, Wisco Products has the components for your fluid-fill interfaces. Wisco Products has been providing quality fluid-fill capping solutions to original equipment manufacturers of heavy duty off-road equipment, mining equipment, construction and agricultural machinery and rail locomotives for nearly 50 years. Wisco Products has fluid-fill caps, necks, strainers, transitional mounting tubes and dipsticks for your pump and other systems. Whatever quantities you require, Wisco Products can supply the solutions for your fuel, lubricant, cooling and hydraulic fluid-fill interfaces. Some of our standard products are shown below. Our staff can also work with your designers and engineers to develop products to meet your special applications. **Contact our inside sales department at 800-367-6570 to see how we can help you.**
